

E-Magazine

A Monthly magazine by the students of NMS-DPS

Flying High Our Aim

Editorial Note

This is the third issue of the E-magazine, 2017. This issue showcases the young talents , who tell us how we can achieve our goals ,by flying high .We would like to thank all our young talents for exhibiting their talents in the form of drawings and poems.

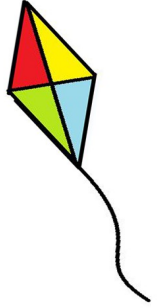

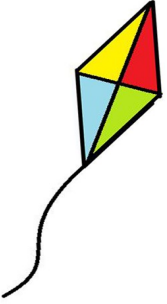

We would like to thank the editorial board as well for helping us illustrate the E-magazine.

AIM HIGH

Aim high,
And you will soar through the clouds.

But if you simply hope to fly ,
You will fall to the Earth.

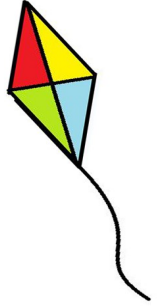

Aim low,
And you will only see what is near.

Aim High,
Fly, Fight, Win

Prathiv, 2A

2

FLYING HIGH OUR AIM

Flying high is our aim

Flying high is our aim,

Reaching the stars we should aim,

If we want success and fame,

We should make work our game,

If we want to reach our goal,

We should always work hard with our soul,

Nothing in the world is impossible,

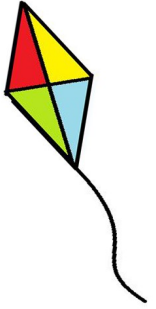

If we hard somehow we can make it possible!

Mohammed Ahmed, 2D

FLYING HIGH OUR AIM

Flying high

Let your dreams take a flight
In the unbound space like a kite
Untie them and let them fly high
Till they reach above the sky

Dreams aren't just dreams , let them fly
They are the goals which you should try

Raise over and touch the sky
Open up your mind and high
Forget about the world and never sigh
Keep on going and leave your dreams to fly!

Fly little bird

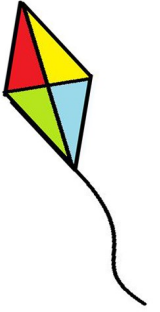

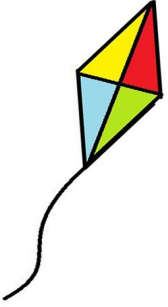

**Go on little bird , take flight up, up high, set your sight
Let your colors reach full potential
Strive to be great, stand monumental**

**Go on little bird, take flight
You won't be alone there shall be light
Guidance and help will be with your side
So don't let fright step inside**

Fly little bird ,fly up high!

Arnav, Grade 2E

Garmi

Jab garmi ki rut aati hai
School ko bandh karati hai
Garmi chuttiyan laati hai
Khel khilone laati hai
Humko kahin le jati hai
Ya mehmano ko laati hai
Sharbat pe koi rok nahi
Aam bhi kekar aathi hai
Garmi humko bhaati hai

FLYING HIGH OUR AIM

I dream of a world where everyone works at eliminating their judgemental nature

I dream of a world where everyone pays attention to their inner calling and apply their own uniqueness to everything they undertake

I dream of a world where people through selfless action , their own fulfillment

I dream of a world where everyone lives in accordance with nature.

I dream of a world where everyone chooses to ignore the lure of acquisition and fame.

I dream of a world where everyone is regarded moral, profitable and a genius extraordinarily ,regardless of any transcript or bank statement may say.

I dream of a world where everyone acts virtuously and do not need rules to be kind and just.

I dream of a world where whatever strains with force will soon decay.

I dream of a world where practices such as boasting and showing off are uprooted leaving people with a humble attitude.

I dream of a world where people let go their need for more and live in a state of pure gratitude.

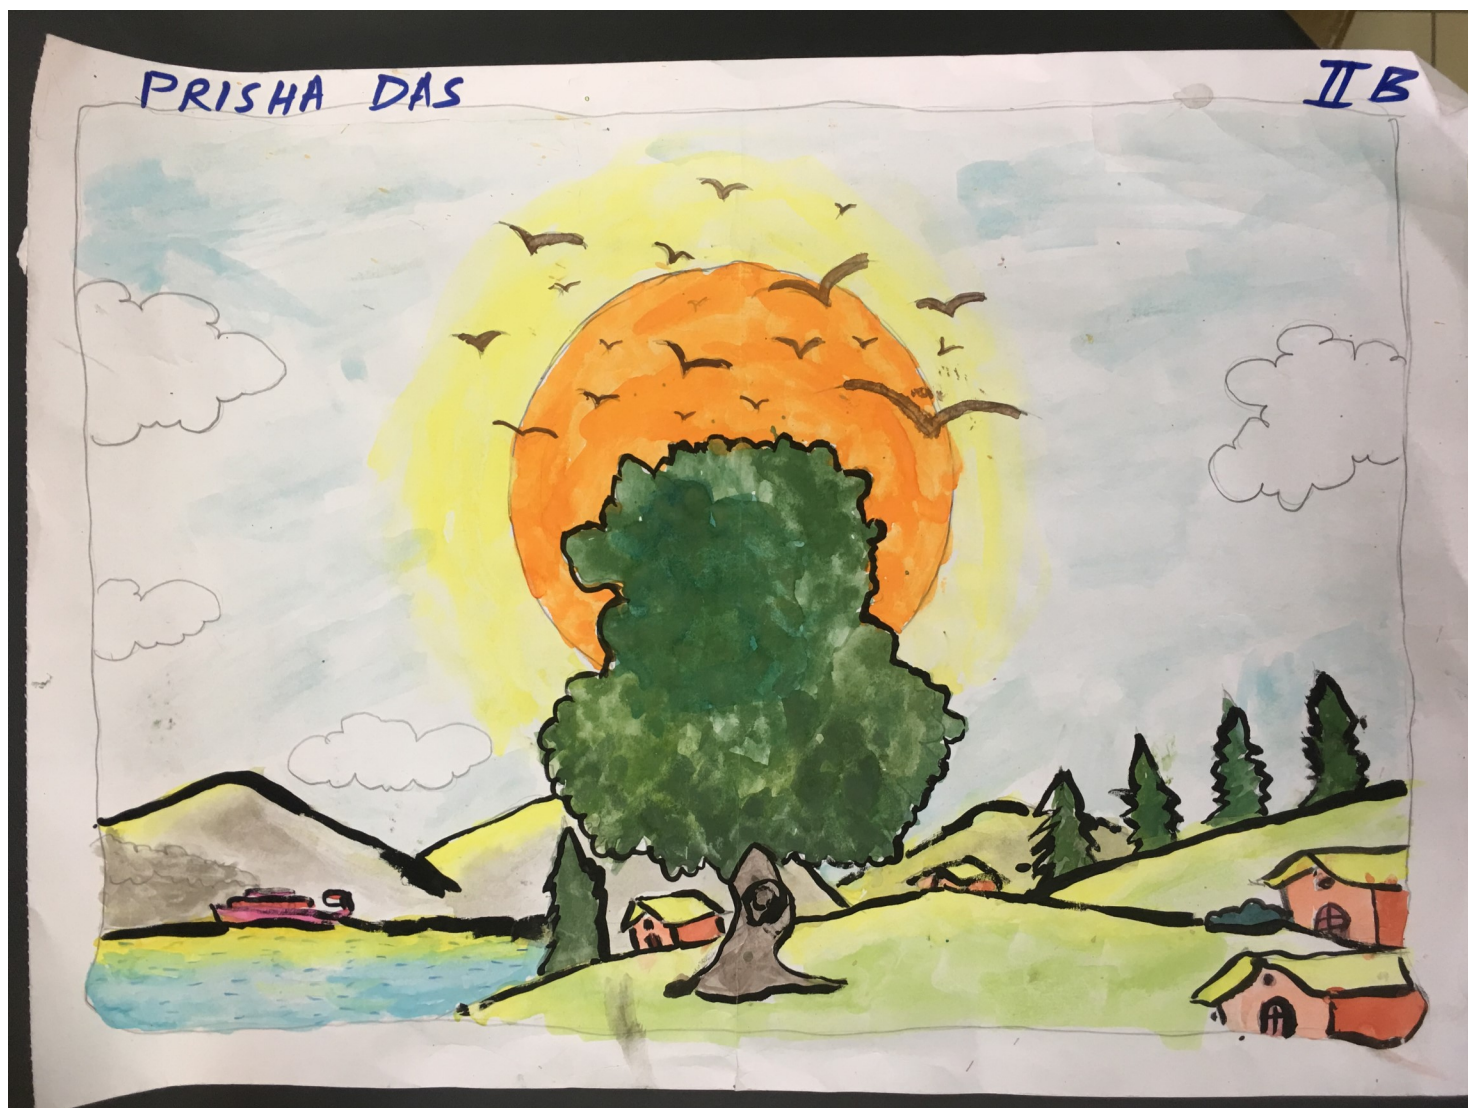

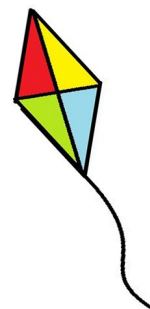

Above all, I dream of a world where no one is stopped from pursuing their dreams, for these dreams are what makes a person come alive

These dreams are what makes a person stay up at night, and these dreams are the secret behind those glittering eyes.

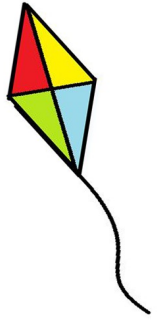

- Ananya (10 B)

I Aim to be.....

I aim to be a teacher

To create country's future

I aim to be a chef

To bake a cake

I aim to be a bird

To fly in the sky

I aim to be a gardener

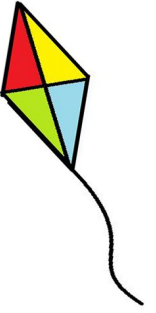

To plant seeds and remove weeds

I aim to be...I aim to be...

-Anjali.P

FLYING HIGH OUR AIM

Flying high

I want to fly high

As the birds fly high in the sky.

Trying to touch the clouds in the day

Trying to touch the stars during the night

I want to fly high and high in the sky

As the moon moves up and up,

I want to fly high and high in the sky.

Making all my dreams come true,

Fulfilling my wishes all the way through,

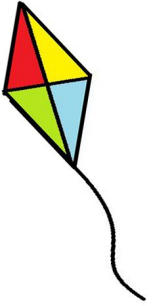

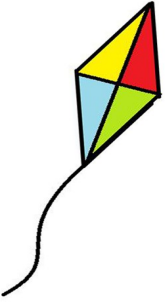

I want to fly high and high in the sky

I want to fly high and high in the sky .

z

FLYING HIGH OUR AIM

Flying high - Our Aim

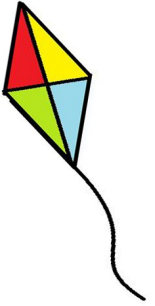

Sky is high and so are clouds
My ambitions fly more high
I always aim the stars
So that I can reach the moon.

I do each thing full of Joy
Be it homework or football
I think well before my task
Then I do it with a smile.

My parents are my base
My teachers are my pillars
With those strong base and pillars
I can aim and reach so high.

FLYING HIGH OUR AIM

I am a scientist
I am a scientist,
I think like a scientist,
I observe something high.
Keen to work on plants and animals,
To reach the sky.
Strive to succeed and,
And ask good questions starting from HOW,
WHEN AND WHY?
I conduct experiments and make projects,
Inspect and keep records,
To reach my greatest expects.
I observe,
A plant grows from a tiny seed,
Sunlight, water and chlorophyll is all that it needs.
I observe,
A rocket reaches the moon,
Launches satellites with almighties boo,
My dreams walk, my dreams continue to walk on
an astronauts talk!
