Editorial Note

**The more that you read,
The more things you will know,
The more you learn,
The more places you go.
So read, read, read.....**

And now, it is our immense pleasure to publish our fifth edition of our E magazine.

This time we have got so many articles from our students.

We are celebrating Diwali {festival of lights} & Children's Day.

The editorial board has been collecting written material on the topic. The students have put their efforts in order to make this venture successful enough.

Read and enjoy!

Computer

Computer is so smart.
Computer mam teaches me,
which is so interesting
However, I learn computer
It is so great thing
Charles Babbage invented it
He is so great
Will you be like him?

Lakshmi Sudheer
Grade 3c

Computer and Science

The Earth rotates slow
The Stars twinkle bright
The Heart beats fast
That is called Science.

The Keyboard types fast
The Mouse moves easily
The CPU helps in calculating
That makes a Computer.

These both subjects make our lives easier.
We can invent more and more ,
for a better tomorrow.

NMS SCIENCE

**NMS Science NMS Science,
I feel around me NMS science
I walk through my school corridor,
with sound, force and mind monitor
NMS Science NMS Science,
I feel around me NMS science
I play in my school playground,
with track, net and colorful round
NMS Science NMS Science,
I feel around me NMS science
Every place I get a slogan,
saluting my eternal gentleman
Science and Computer science,
Rocking knocking digging mines
NMS Science NMS Science,
I feel around me NMS science**

POEM (MOTHER)

The one who borne us

The one who fed us

The only who look care of us

She is the one who thought for us a lot.....

She is the one,

Who taught us how to walk

How to learn, How to speak

Taught us good things,

That's lady is the mother....

Whom we love the most,

We thank her for guiding us to our

Destiny,

THANKS MOTHER...THANKS A LOT

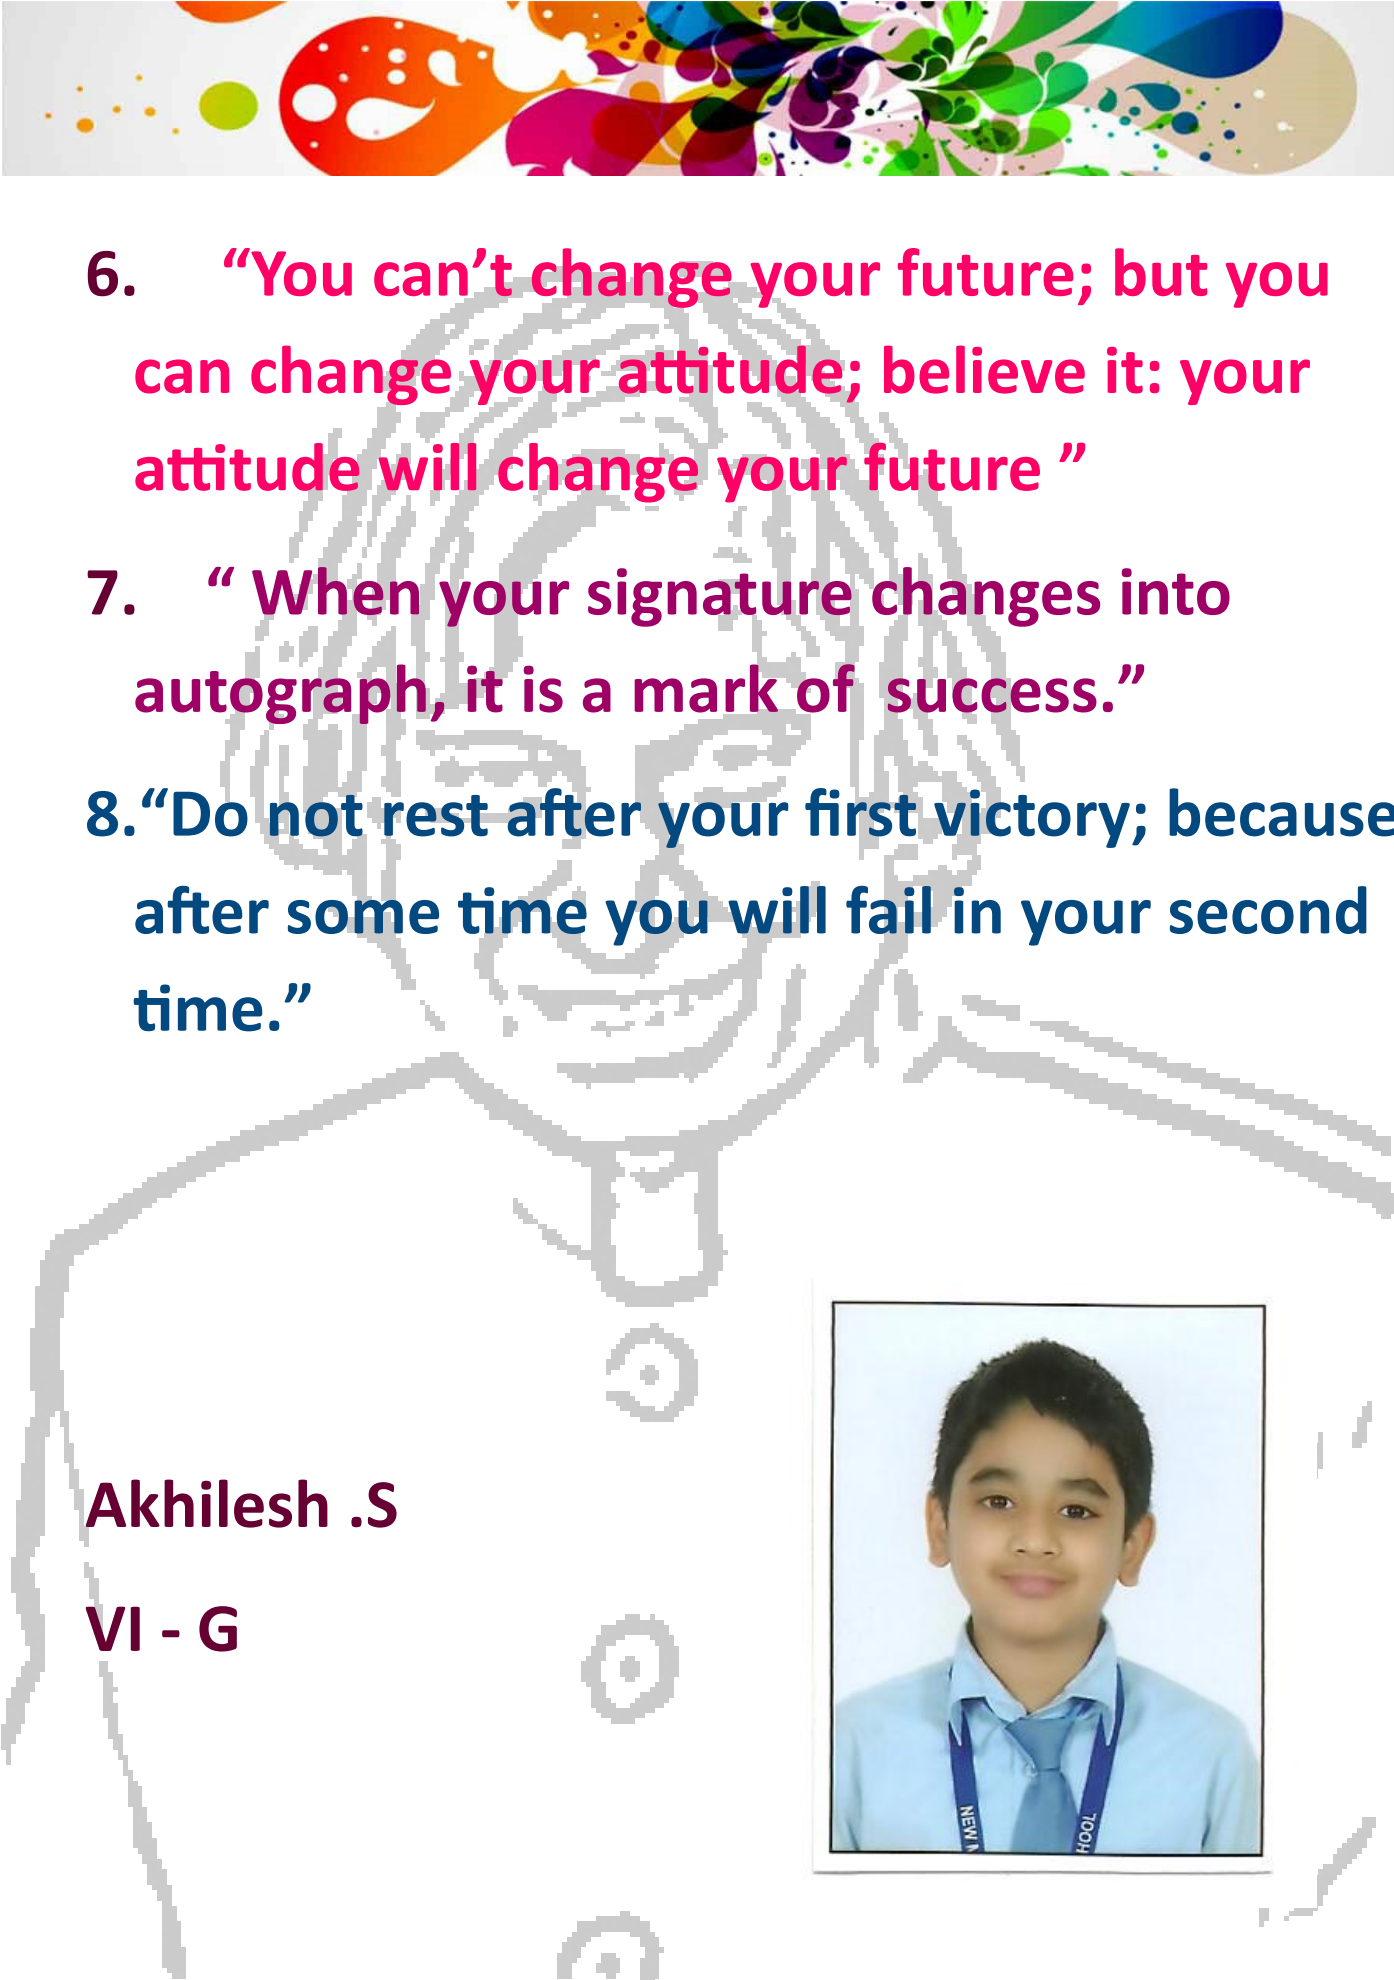

Thoughts of Dr. APJ Abdul Kalam

1. “Dream is not the one you see in your sleep; it is the one which does not allow you sleep.”
2. “People who wait will get only little while people who wait will get more than what they think.”
3. A good book is equivalent to 100 friends; while a good friend is equivalent to a library.”
4. “If you want to shine like a sun; then burn like a sun.”

- 
6. “You can’t change your future; but you can change your attitude; believe it: your attitude will change your future ”
7. “ When your signature changes into autograph, it is a mark of success.”
- 8.“Do not rest after your first victory; because after some time you will fail in your second time.”

Question: What according to you, sir, is the biggest challenge our nation faces today?

Answer: The human overpopulation issue is the topic I see as most vital to solve in this expedition to create an India I have envisioned in the years to come. With a large population falling below the poverty line, our growth is limited, I believe. To conquer this problem, the simplest way out is lifting them up. For instance, small scale industries could be set up for generation of employment.

(Vridhi Mathur - IX A)

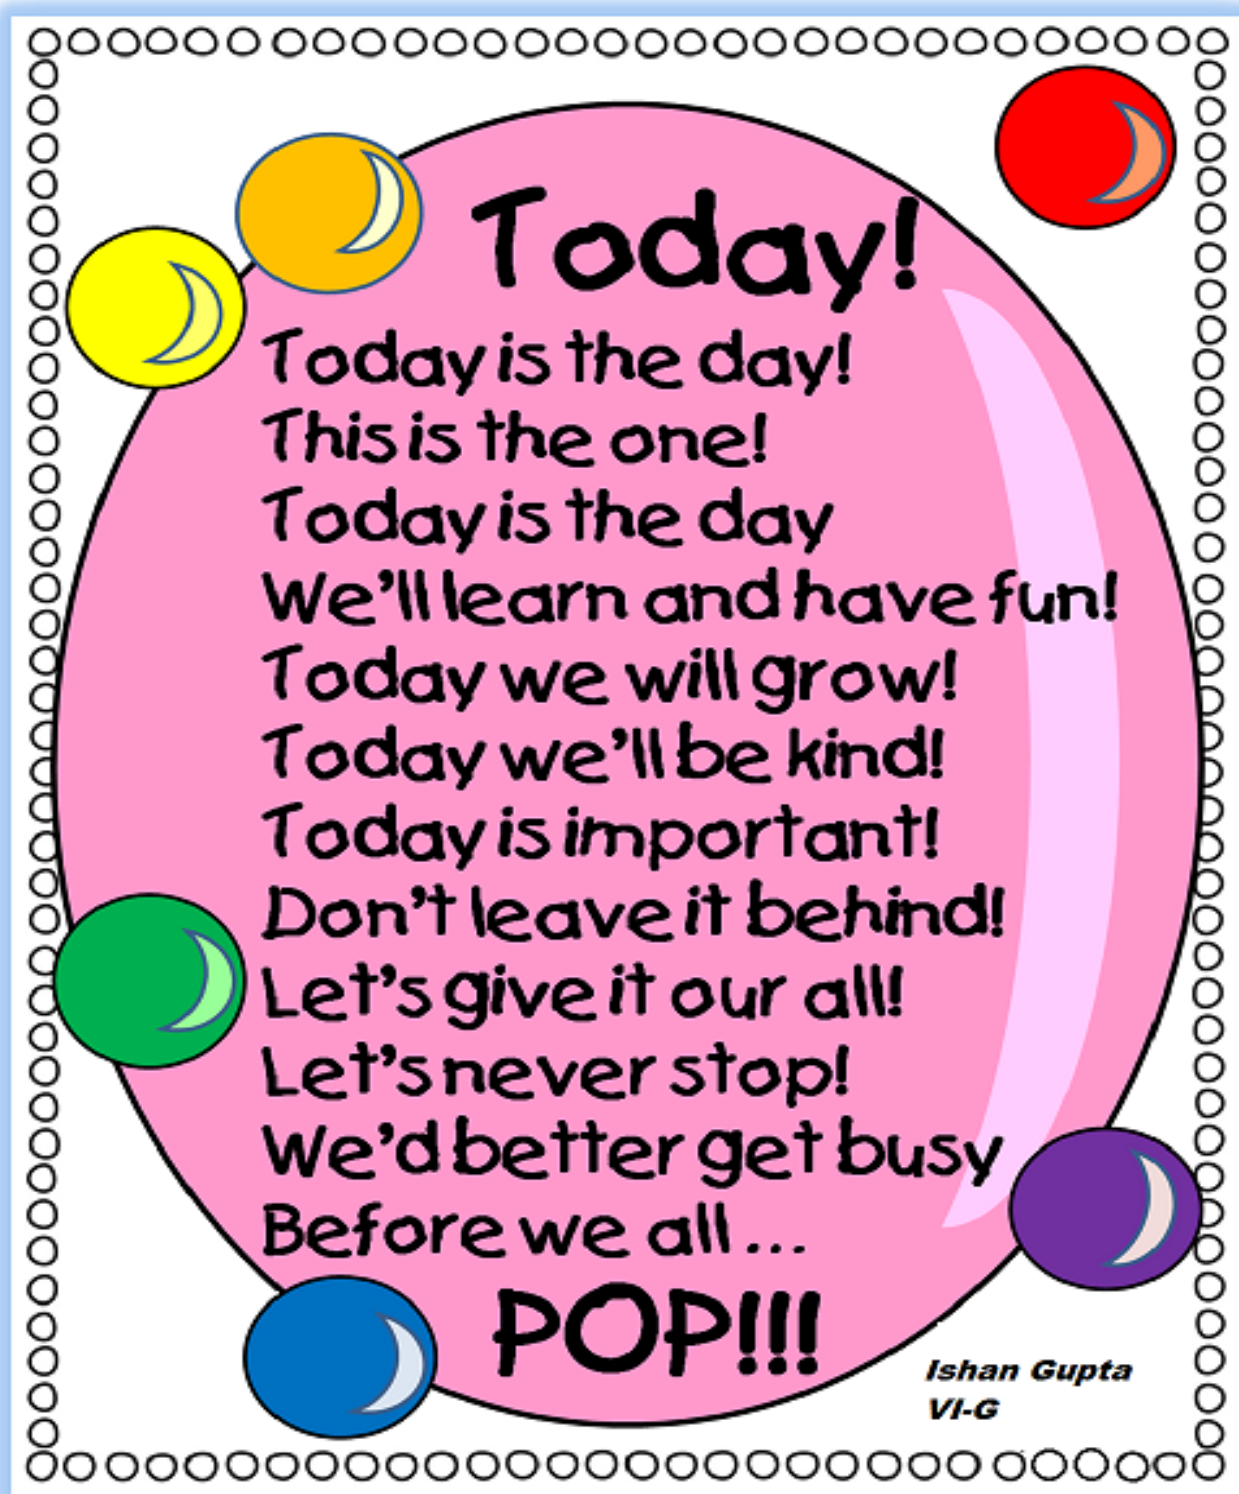

Do you think our vision of ten years down the line will positively be achieved? If so, what according to you, sir, are the necessary steps to attain this goal common to all citizens?

Answer: *Of course it will! In fact, why wait for ten years down the line? Why not now, right this moment onwards? As I have stated many a times earlier, the ignited mind of the youth is pivotal in this expedition of India's development. Our objective should solely be unearthing the potential of these young minds.*

The capacity to be built is – “I can do it... We can do it... India can do it...”

(Benonin Johnson – XI A)

POEM: ISHAN GUPTA VI-G

ARTICLE ON NEPAL EARTHQUACK

A major earthquake occurred in Nepal on 12 May 2015 at 12:50 pm local time (07:05 UTC) with a moment magnitude of 7.3, 18 km (11 mi) southeast of Kodari. The epicentre was on the border of Dolakha and Sindhupalchowk, two districts of Nepal. This earthquake occurred on the same fault as the larger magnitude 7.8 earthquake of 25 April, but further east than the original quake. As such, it is considered to be an aftershock of the 25 April quake. It struck at a depth of 18.5 kilometres (11.5 mi). Shaking was felt in northern parts of India including Bihar Uttar Pradesh and West Bengal. Tremors were felt as far as about 2400 kilometres away from the epicentre in Chennai.

Minutes later, another 6.3 magnitude earthquake hit Nepal with its epicenter in Ramechhap, east of Kathmandu. The earthquake was felt in Bangladesh, China and many other states in India. The impact of these tremors was felt even 1,000 kilometres away in the Indian capital New Delhi, where buildings shook and office workers evacuated. In this earthquake, 218 people died and more than 3500 were injured.
