Editorial Note

Dear Readers,

*Time goes so fast,
It's hard to believe.
Aspiring to achieve,
A journey to cherish.
One full of dreams!*

And now, it's our immense pleasure to publish our Third edition of our E-Magazine.

Since this is a small collection of articles, and pictures, we will strive to do our best in bringing forth something new and something exciting for our readers.

This month we have tried to collect articles from all quarters and we have messages for loving teachers from the Ex-students as well. Our creative thinkers, the students as always have been the main contributors, who are supported by our enthusiastic and dedicated teachers.

Sit back & Enjoy!

Benonin Johnson

Messages

Ex - Students

- ✍ Wishing all my teachers a very Happy Teachers' Day. I am very grateful to all my teachers for helping me stride confidently towards the future. Your precious guidance has not only helped me in academics but also in grooming myself as a confident individual to face the various challenges lying ahead.

- Aditi Gupta

- ✍ Happy Teachers' Day to all the wonderful teachers out there at NMS. I want to thank @meenakshimathur and @yaminiramesh for being my motivators and guides since Grade 4! A big thank you to @bijigeo and @mercythomas for making me love Maths even more!! I love you all and I thank you all for giving me so many opportunities to discover myself and in becoming who I am today!

- Apoorvee Singhal

- ✍ Happy teachers' day. Thanks a lot to each of u for all your love, support and guidance that has played a huge role in making the Sanjana I am today! And a special thanks to mercy ma'am and the fiitjee sirs!

- Sanjana Sarkar

✍ Happy Teachers day. Words cannot express how thankful i am for the amount of love, care and continuos support.

- Heraa Islam

✍ I can never forget NMS because that is where I had began my building blocks to education.. I had been there for 10 years and in that duration I met such amazing and fun loving teachers.. So on the occasion of teacher's day I would like to wish all the lovely teachers a very Happy Teacher's Day!

- Dheeptha Shetty

✍ A very Happy Teachers' Day to all the brilliant teachers at NMS! Special shout out to @meenakshimathur for actually making me look forward to History & Demo. You're the best! I miss being shouted at by you for being late to the bus every morning. Lots of love & appreciation for @sanjaykumar @aniruddhabaranwal @sanjaychaudhuri for all the hard work you put in and your constant support for both Pratyush & I. (I am FIITJEE's no. 1 fan.) #FIITJEEftw

- Ananya Mishra

✍ I would only say that I have loved you all unconditionally, and you are my Family. Thank you for pushing me to the point where I dint want to give up on myself anymore, lots and lots of love and super dooper.

- Rukmini Chatterjee

✍ Happy Teachers Day to all the beautiful teachers at NMS! I can't thank you enough for all the things you've taught me, within and outside of the CBSE curriculum. I'll always be proud to be an NMS student!

- Surbhi Mathur

✍ Happy Teachers Day to all you teachers!!! I am still in love with NMS and even in second year of college i say am an NMS student!

- Aanya Roy

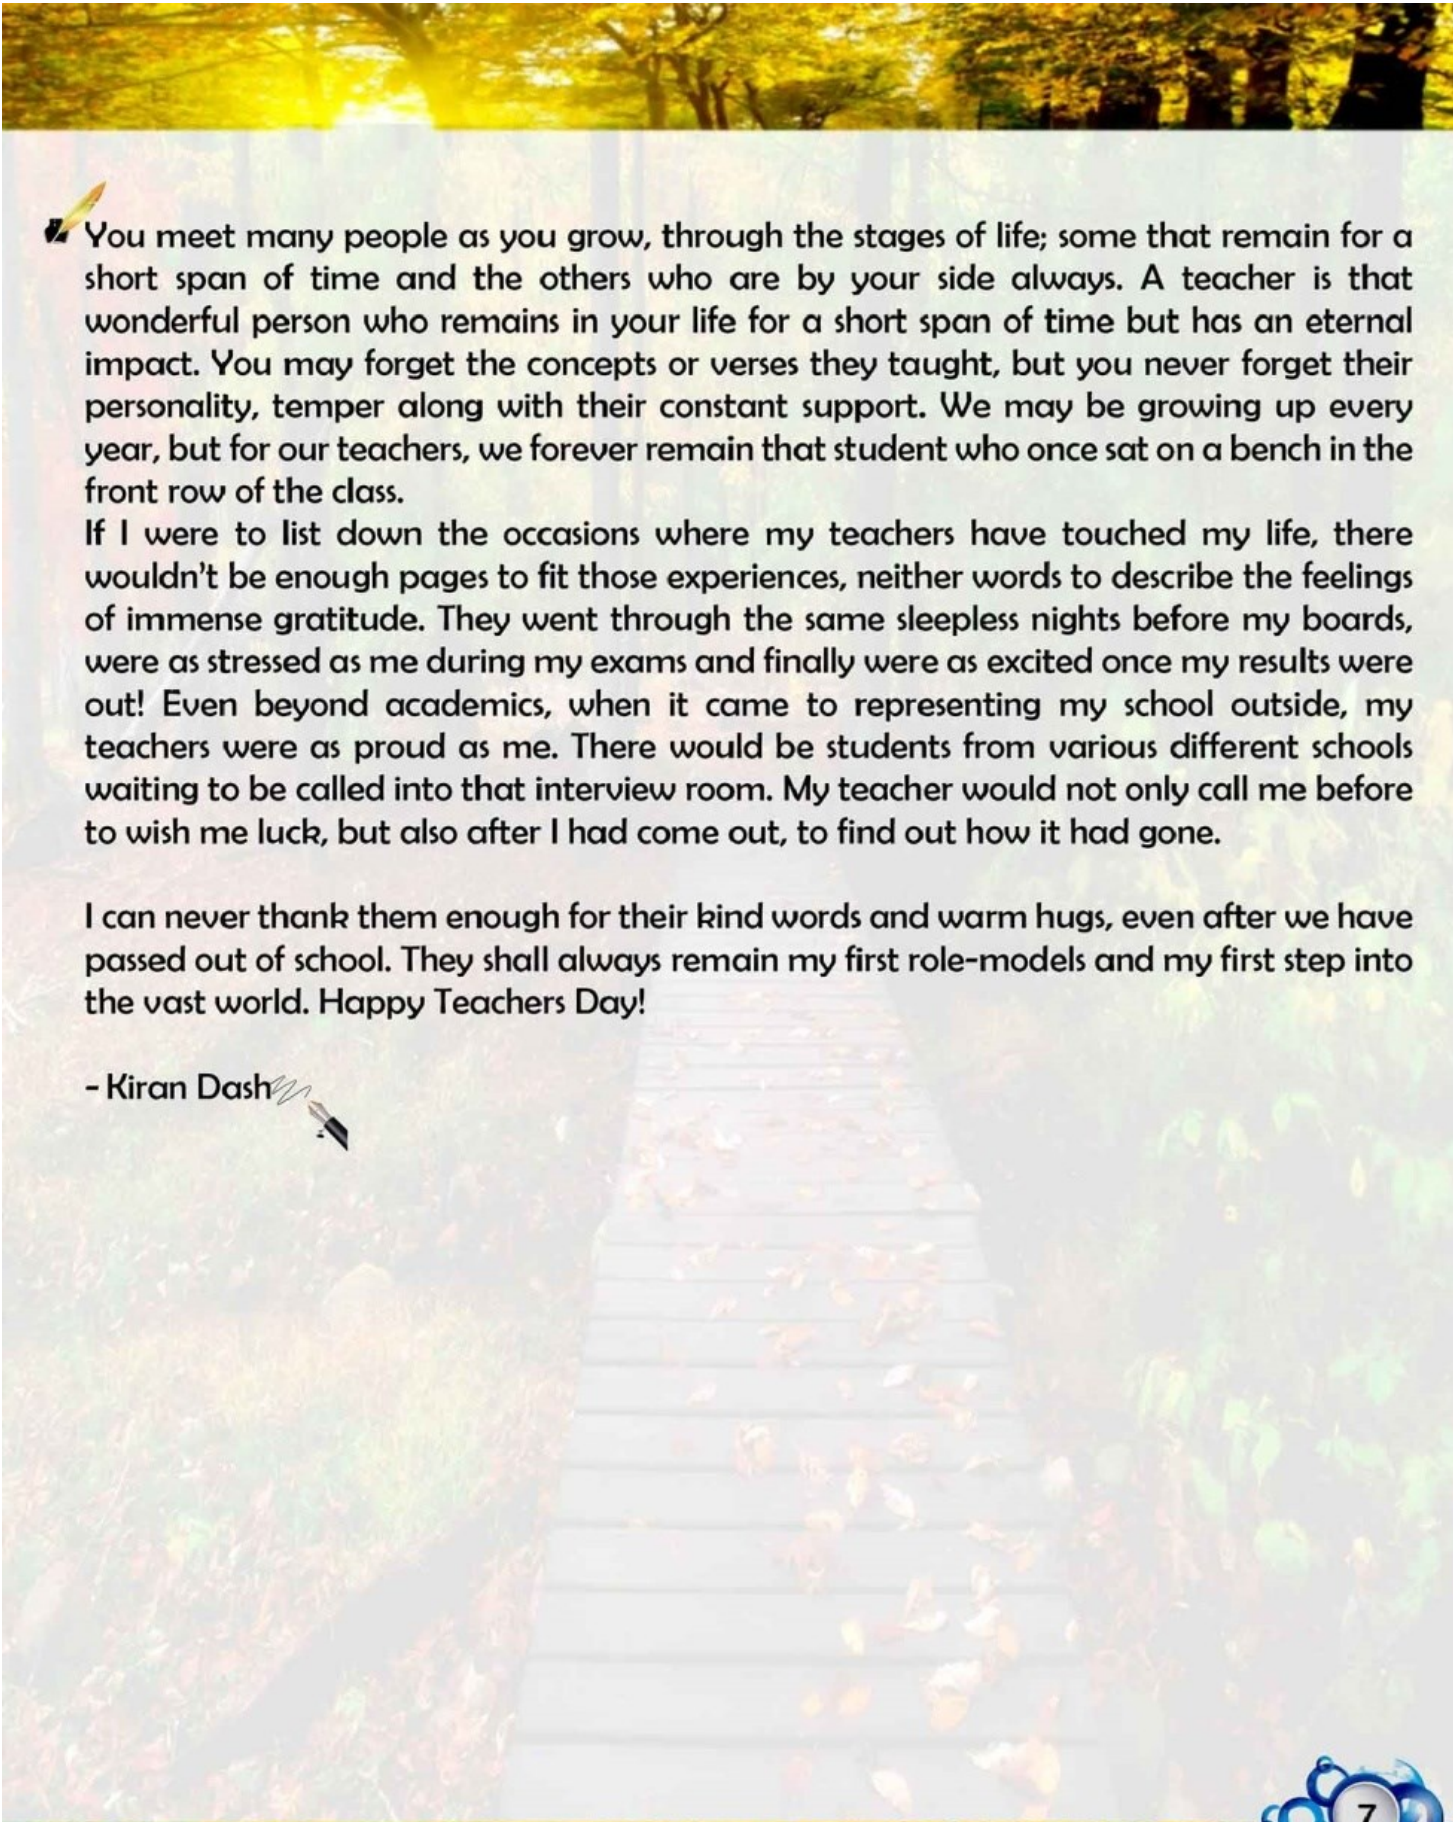

✍ Sitting in my dorm door one day, I came across a few pictures of my NMS teachers and felt extremely nostalgic. I began recollecting all the wonderful memories NMS created for me. The school creates a wonderful learning space for students, constantly preparing them for life after school. The education I received at NMS was not just academic centered but instead focused on life skills, lessons that will remain with me for life. What makes the NMS experience extraordinarily special are the warm, welcoming teachers. Not only do they make classes fun and interesting, but they also double as our friends. Genuinely concerned about a student's wellbeing, they ensure that we feel at home in school. The unbreakable bond between students and teachers at NMS grows stronger with time. Over a year out of school, I was pleasantly surprised to receive phone calls from my NMS teachers wishing me on my birthday. It made me emotional and conscious of the pure love that NMS teachers shower their students with. NMS is an amazing space to say the least. I always was and will always remain a proud NMSite!

- Nainika Dinesh

✍ Happy Teachers day to all the teachers at NMS who taught me for the five years I was there. Some of you liked me, others found me unutterably annoying, but overall, you've been instrumental in making see the man I want to be, with your ever present encouragement and criticism. I appreciate the opportunities you gave me to use my small talents to good use, and I won't forget any of you thanks all the experiences you've provided me with. Thanking you once again for all your support and wishing you a happy year ahead,
Till we meet again,

-Abraham Mathew

 You meet many people as you grow, through the stages of life; some that remain for a short span of time and the others who are by your side always. A teacher is that wonderful person who remains in your life for a short span of time but has an eternal impact. You may forget the concepts or verses they taught, but you never forget their personality, temper along with their constant support. We may be growing up every year, but for our teachers, we forever remain that student who once sat on a bench in the front row of the class.

If I were to list down the occasions where my teachers have touched my life, there wouldn't be enough pages to fit those experiences, neither words to describe the feelings of immense gratitude. They went through the same sleepless nights before my boards, were as stressed as me during my exams and finally were as excited once my results were out! Even beyond academics, when it came to representing my school outside, my teachers were as proud as me. There would be students from various different schools waiting to be called into that interview room. My teacher would not only call me before to wish me luck, but also after I had come out, to find out how it had gone.

I can never thank them enough for their kind words and warm hugs, even after we have passed out of school. They shall always remain my first role-models and my first step into the vast world. Happy Teachers Day!

- Kiran Dash 

Messages From Students Presently Studying in NMS

✍ Teachers don't impact for a year, but for a lifetime. They ignite the fire of learning in the mind that is yearning for knowledge. This influence persists beyond school, college and university, and becomes the beacon of light, guiding us through the journey of life. Leading a child to learning's treasures, gives a teacher untold pleasures. I would like to thank all teachers for being a good friend, a better guide and for inspiring us all the way.

- Rohil Mathur 

✍ I still vividly remember the first day of school as if it had been just yesterday. As the hazy memories of my first years as NMS fly away, it suddenly dawns upon me that this would my last few months at this school. Overcome by nostalgia and suddenly at a loss of words, I can definitely say that the teachers here have stood by me just as my friends have. 12 years here and I've learnt to build hopes, dream big, achieve and be responsible. Teachers have taught me not only to be literate but rather the greater application of knowledge in real life. I would have probably not met their expectation at times, but they've always picked me up, smiled and given me a pat and encouraged me. They've taught me to not give up and strive for success no matter what. It is indeed rightly said that, "That those who educate children well, are to be more honoured than those who produce them". With this note, I would like to end by thanking each and every teacher who has taught me and made me what I'm today. HAPPY TEACHER'S DAY!

- Keerthy Subhramani 

✍ "Teachers have three loves- The love of learning, the love of learners, and the love of bringing the first two loves together..." On this day, i would like thank all my teachers who have constantly supported me, imparted their knowledge to me and guided me along the right path! I would like to thank them for inspiring me and inculcating the feeling of positivity within me! Happy Teachers day!

- Soumyabrota Sen 

Messages From Students Presently Studying in NMS

 In all my 12 years of education in NMS I have realised that teachers do so much for us in such a short span of time! For example a teacher once carried me when I had problem in walking, guided me to the right way, stayed with me when I needed someone and wiped my tears when I cried. Now I feel that I wouldn't be wrong to say that teachers have changed me for good. Which is why I would like to display my love and respect towards these loving and supporting teachers on this special day by wishing them a very Happy Teacher's Day!

- Alex Roy 

 Even though we have several books for different subjects , their true meaning and ideology can be only explained by teachers. They not only teach us but also groom us. So on the auspicious day of teacher's day I would like to thank all my loving teachers for their continuous support and guidance.

- Akash Srivastava 

 The best teachers in the world teach their disciples to look in the right direction and but urge them to find their own goal. I have been blessed to have such wonderful teachers over the years. A very Happy Teacher's Day to all our well wishers!

- Moksh Pachisia 

 A great teacher takes a hand, opens a mind and touches the heart. I believe we're blessed with incredibly skilled and loving teachers and I'm hoping each and every one of them enjoy this day, as well as the others, to it's fullest. Happy Teachers' Day!

- Aishwarya Mullamuri 

Messages From Students Presently Studying in NMS

 Teachers are the guiding compasses that points only towards the direction of true knowledge. Teachers day is a way of showing gratitude towards the loving and skilled teachers that have a lasting effect on our lives. As a student of grade 10 I have gone to numerous schools and have had the experience of learning under the guidance of numerous supporting and loving teachers. I would like to take this opportunity to thank all our teachers for their guidance.

- Aryan Bijay 

 Born as a child with certain speaking difficulties till the age of 6, the early years of my life weren't the easiest to go through. It wasn't my parents however, who helped me get through this phase. It was my kindergarten teacher, and since then, I have had the privilege of learning under amazing and patient teachers who have helped me through every stage of my life. Therefore, on the occasion of Teacher's Day, I would like to take the opportunity to wish my wonderful, energetic and diligent teachers a very Happy Teachers' Day!

- Shanmukh Karra 

 A teacher takes a hand, opens a mind and touches a heart, without their hard work, integrity and perseverance we wouldn't be who we are today. To the world they may be just a teacher but to us students they're truly a star. So here's to the most amiable and diligent teaching faculty of NMS Bahrain! It's them who make us realize that we are capable of Achieving more than we or anyone else thought we could. They truly are our superstars. Happy teacher's Day! We love you.

- Greshma Shyam

- ✍ A good teacher can inspire hope , Ignite the imagination and instill a love of learning.
Thank you to all my teachers! happy teachers day!

- Aniketh Das Roy 

- ✍ This one is for those who inspire us today, who always lend a helping hand and show us the way. Yes, they are none other than our dear teachers, who have worked for us day and night, recognizing our potential, bringing out the best in us, supporting and guiding us and making us believe that they're always ready to help us and place an example before us whom we can always look up to. Wishing a very Happy Teachers' Day to all our lovely teachers and we hope to continue sharpening our blunt edges under your guidance so that we can make you proud one day.

- Kirti Dash 

Nature

*It is not a way how you dirty the earth,
Why we should throw garbage on roads.
Why we are not understanding the problem
God has given us such a beautiful gift,
Still we do not understand
Why, why, why, why
Tell me why, why we are not understanding it
Problem of every human
We don't understand the gift of God
We should understand and care about it
And thanks to god for giving us such a wonderful gift.*

MESSAGES FROM TEACHERS & EX-TEACHERS

 It is a well-known fact that the success achieved is always in direct proportion to the passion ingrained in our actions. If we are half-hearted in our approach, we achieve minimal results. If we give our absolute best, miracles can also happen, sometimes leaving us wonder struck. The more sincere efforts would definitely lead to long-lasting positive results. Just as a drop of water is worth more than a sack of gold to a thirsty person, similarly right direction, right attitude and right knowledge are important to achieve excellence.

Instead of exposing the child to a maze of new-fangled ideas, we, the teachers should identify the hidden potential of every single child and channelize it in the right direction. This would ensure that the child would advance with passion towards achieving excellence in life.

- Deepti Sabharwal 

 I had the privilege of working with NMS -DPS for 4 years the best part of my career journey and am thankful to the Principal sir and all my colleague for all there support guidance and direction and really miss all my students I love you all the most and believe in you and it is wonderful to see you all learn and grow over the course of years . Congratulations on your accomplishments and best wishes for all to come.

- Sunita Wadhawan 

 As I am mostly with the students, they are the ones i know the best, therefore the ones I will talk mostly about. Our students are very sweet, very attentive, well behaved. They actively participate in studies as well as extra-curricular activities. They love running around, shouting, playing. Our children receive plenty of attention. They also receive plenty of affection. I thank all my colleagues for their love and affection to the little ones. They make the students comfortable in the school.

- Jyothi Lira Pinto 

MESSAGES FROM TEACHERS & EX-TEACHERS

 My association with New Millennium School-DPS Bahrain dates back to nine years when I joined this prestigious institution in March 2006. Since then, I have seen the school growing from a small community of 500 students and 50 teachers to a large family of 2000 students and over 100 teaching and non-teaching staff. More importantly, I have seen myself growing as a teacher, learning something valuable each day, both from my dear students and from my colleagues. The flexible working environment, with a dedicated and hardworking team has made me more mature both as a person and as a teacher. Over the last nine years, typing and setting question papers, the use of smart projectors and the school portal have indeed improved my computer skills and made me more tech-savvy, though I still take my students' help in aiding me in areas unfamiliar to me. It is very satisfying to see batches of students whom I had taught from 2006 till date, successfully passing out and joining prestigious institutions. I take this opportunity to thank our Principal for having the confidence in me to initiate Model United Nations (MUN) in the school and it is very heartening to see my students actively engaged in debating world issues and bringing laurels to school by receiving awards in all MUNs that we have participated in.

- Meenakshi Mathur 

MESSAGES FROM TEACHERS & EX-TEACHERS

✍ Being a teacher in NMS has been one of my most (treasured) memories in my sojourn in our planet. . As I traverse down the memory lane..I recall my interview with M.S Naqvi, .the then principal of NMS,on 26 april 2005. I was overwhelmed when I got the offer to join on that very afternoon.

During that time the school had roll strengths only till Gr 8. The first thing that touched my heart was the class teachers were named ' Home room teachers' in consonance with the vision of DPS to create an ambience in the class as cosy' comfortable and intimate, which kids experience in their own homes. In no time I became an integral part of that extended family. I was touched by the humble and extra polite behaviour of the students...an instinct perhaps slowly becoming rare. Teaching in NMS added a new dimension to my life...Activity oriented teaching which is now the backbone of the CBSE CCE curriculum was extensively practised in NMS during that time...I still remember that while taking an Eng lesson in Gr 3 we actually prepared kheer to enable all our gr3 students to have the taste of it. Activities like making dolls from waste materials, observing fruit salad day etc were unheard of in other schools and we had the immense pleasure of indulging in those activities so often.

The monotony of waking up every morning at dawn and sleeping only at midnight was a norm for me as a lot of emphasis was laid on 'Planning well ahead"...but still going to school was a sort of relaxation amidst the drudgery of my daily chore. I felt a lot better at school because of the presence of my 'fantabulous' students and compassionate colleagues ... Supportive and cooperative, cool and composed, genial and generous they actually made me look forward to school. I shared a special relation with everybody...not only the teachers..But also the administration, the support staff and ...everyone...

Smothered in self – triumph, as I lean back, close my eyes and reminisce about the years of my days in NMS salivating thoughts of endeavour and success, admittedly intertwined with sporadic failures. it is one to remember. I will ever cherish and treasure those fond memories. Thank you all to allow me space in your hearts.

To conclude...

Angels lift us to our feet when our wings have
trouble remembering how to fly
you've been an angel
Such support, an aide, a crutch
A friend, not just in fair weather but foul
And we have been grateful ever so much
To this ardent friend...NMS-DPS.

- Indrani Dasgupta

Memories

*I'm happy that you're my teacher;
I enjoy the lessons that you teach.
As my role model you inspire me,
To dream and to work and to reach.*

*With your kindness you get my attention;
Every day you are planting a seed.
Of curiosity and motivation,
To know, grow and to succeed.*

*Forever I'll keep your memory,
Stored within my heart.
Forever I'll remember,
Just how you played a part in my life.*

*You played a part by teaching me,
To think bigger and to think higher.
I will never forget you,
As for greatness I'll aspire.*

*You make my life better,
both in and out of class.
Your lessons enrich my brain.
Your caring touches my heart.
You are an extraordinary person,
Etched in my memory forever.*

*You played a part by telling me,
My dreams will all come true.
For teaching me how to believe,
Teacher I'm thanking you.*

The Past of my Future (Contd..)

I went to my office and sat on the big cushioned black leather chair, which I had always wanted to sprawl on since childhood, with the latest model of the Apple MacBook Air on my desk. A cup of steaming hot chocolate was kept next to a pile of reports. I went through each report one by one. Our journalists were working round-the-clock to dredge information on a slew of recent cyber data breaches which had been causing bank managers severe headaches lately.

After a long day of work, I reached home at around 6 in the evening, and switched on the television to flip through a few of my favorite channels. It had definitely been a busy day and I still had a lot of work to do, but I didn't feel tired at all. I made dinner for myself, which was quite surprising, as I have always been a terrible cook. It was almost 9 by the time I had finished my work and eaten dinner. I made my bed, and lay down for some time thinking of how I had reached here. I thought about how much I loved my work, and how much I had struggled to get here. With these thoughts in mind, I drifted off to sleep, waiting for a new day, where I would learn something new.

Suddenly, someone started screaming in my ear. "Get up, we are late for school!" I opened my eyes and saw my sister frowning at me. I recognized the place immediately. It was my room, and I was still on my chair with the homework strewn all around on the table. I hadn't woken up on time, and we were going to be late today. I closed my books, put my essay in a file, and went to get ready.

Although it was like any other day, I felt different. This dream had turned out to be one of the most beautiful illustrations ever written in my life's book. "Dreams – The fuel in the furnace of achievements", I thought, as I decided what my title for the English essay would be. I realized that to reach the position I had dreamt of, I had to put myself through the paces of doing the uncomfortable until it became comfortable. This dream was a projection of the kind of life I wanted to lead.

"Never again am I going to take my school work as a burden", I said to myself as I entered the class and prepared to work through the past of my future!

Project Name :
Robot vehicle which work due to Light source

Project Details

Instruments used:

1. Two motors
2. Two light dependent resistors
3. Two transistors
4. One battery
5. Connecting wires (3 black and 3 red wires)
6. Sensitivity adjustment resistors
7. Roller wheel
8. Screws

How to work with it:

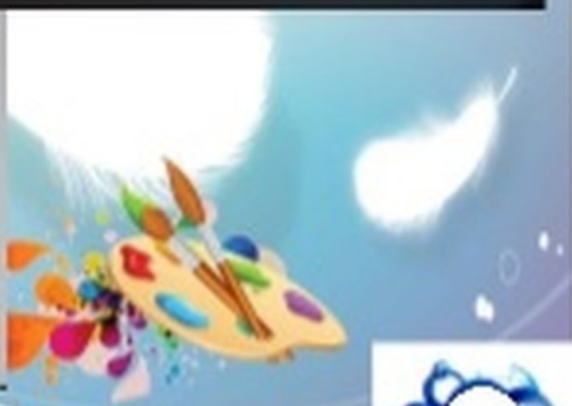

1. Project the light on two light dependent resistors it move. If you need to change its direction front to reverse, alternate the wires of the motors.
